Geekster : Full-Stack Developer Training / TA

September 2023- Present

- Actively participating in an immersive training program focused on full-stack web development, encompassing HTML5, CSS3, JavaScript, React, and Node.js.
- Collaborating with mentors and peers to tackle real-world projects, honing problem-solving skills, and fostering teamwork.
- Actively engage in assisting fellow trainees in resolving programming doubts, fostering a supportive learning environment.
- Implementing best practices in code review, version control, and project management using Git/GitHub, ensuring codebase integrity and collaboration efficiency.

Graduate Engineer Trainee :KPIT Technology

August 2022-September 2023

- Completed a training program in Java programming, gaining hands-on experience in developing robust and scalable applications.
- Applied object-oriented design principles to architect and implement software solutions, focusing on modularity, reusability, and maintainability.
- Collaborated with cross-functional teams to analyse requirements, design technical solutions, and deliver high-quality software products within project timelines.
- Participated in code reviews and quality assurance activities, ensuring adherence to coding standards, best practices, and industry regulations.

Projects:

Expense Tracker and Budget Planner ([LINK](#))

- Developed an Expense Tracker and Budget Planner application using JavaScript, enabling users to plan expenditures, track savings, and create budgets effortlessly.
- Integrated AI functionalities to offer personalized insights and recommendations, enhancing user experience and facilitating informed financial decision-making.
- Utilized Razor pay for seamless payment transactions within the application, allowing users to conveniently pay taxes and manage finances securely.
- Implemented rigorous testing procedures to ensure the reliability and robustness of the application, delivering a high-quality product to users.
- Received positive feedback from users for the intuitive interface and comprehensive features, contributing to improved financial literacy and management skills.

Louis Vuitton Clone Website ([LINK](#))

- Developed a responsive e-commerce website inspired by Louis Vuitton using HTML, CSS, and Tailwind CSS.
- Implemented custom animations and transitions to enhance user engagement and create a visually captivating experience.
- Leveraged SEO techniques and web performance optimization strategies to maximize site visibility and speed.
- Led a team presentation during Geekathon where our project was showcased, assuming the role of team captain

Facebook Clone ([LINK](#))

- Developed a Facebook clone utilizing HTML, CSS, JavaScript, and Tailwind CSS.
- Implemented a dark mode option to enhance readability and user experience in low-light environments.
- Introduced a profile page functionality, allowing users to personalize their profiles with photos and bio information.
- Ensured responsiveness across various devices and screen sizes for optimal user experience.
